Provides expert knowledge in human health risk assessments; Environment, Health and Safety management; health and safety accident investigations; health and safety in construction; industrial hygiene, OSHA recordables, personnel monitoring, and health and safety program development. Mr. Florczak provides support and consulting services to clients in both the private and public sectors.

PROJECT EXPERIENCE

Representative HSE Project Experience

- BP Refinery, Whiting, IN: Oversight of ad-hoc environmental requests from the BP Refinery. Directed and coordinated with the on-site BP inhouse CIH, as well as safety and management in the development and execution of the refinery's environmental procedures and requirements.
- Memorial Health Systems, Various Locations, IL: Oversight and design of indoor air quality (IAQ) testing protocols, as well as other environmental issues during both operational and construction of existing and new hospitals throughout Illinois.
- Chicago Bridge and Iron Co., Plainfield, IL: Oversight of post fire renovations and asbestos abatement after an electrical fire in 2017.
- Household Bank North America (various locations): Provided numerous indoor air quality assessments at many locations throughout the U.S. due to worker complaints.
- Army Corps of Engineers flood gates construction, New Orleans, LA: Responsible for HSE on building of flood gates post hurricanes Katrina and Rita.
- Exxon Mobil, Albers, IL: Controlled off-site emissions and monitored worker exposure for various hazardous constituents. Installation of a geotextile cover for a 700-acre gob pile (coal mining waste).
- NICOR, Naperville, IL: Air quality testing/confirmation of clean up (hopcalite screening), formerly Northern Illinois Gas Company. Mercury clean-up projects over entire Northern Illinois.
