

Consulting Services for Appliances & Electronics. Designed for your success.

Intertek

Count on the experts at Intertek Consulting Services as your comprehensive solution to get your appliance and consumer electronics products to market faster. Get on-demand expertise to accelerate your product design and market launch, access global markets, reduce costs, and mitigate risks. Our consultants are available when you need them, whatever your need.

Expertise On Demand

The team of dedicated experts at Intertek Consulting Services provides customized solutions to meet your management challenges. Combining our testing expertise with an industry-leading breadth of consulting services, Intertek offers a unique partnership approach to managing compliance throughout the entire product development and launch process. Choose the level of service that meets your needs, knowing that our consultative, client-focused teams are dedicated to helping you gain competitive advantage in the global marketplace. Rely on our expertise to lead your project, or use us as on-demand support for your in-house resources. You make the call.

Your business. Simplified.

- Get to market faster
- Access on-demand expertise
- Reduce costs
- Mitigate risk
- Establish global reach

Product Design

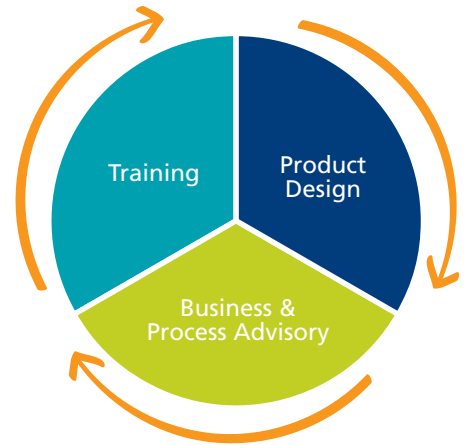

Let Intertek Consulting Services support your product design, R&D, and innovation teams in developing competitive products and bringing them to rapidly changing markets. We help at every stage, from identifying compliance, certification, and testing challenges to providing clear, actionable performance and safety assessments, and assistance with documentation. With our “design it right the first time” expertise, you’ll reduce rework and product failures, and get your products to market faster.

Business & Process Advisory

Get the expert guidance you need to manage complex global supply chains, reduce costs, and mitigate risks. Intertek consultants have the breadth of expertise to build strategies around component selection, chemical and environmental compliance, and product management to meet changing technical and regulatory requirements in more than 100 countries. We can optimize existing infrastructure to streamline your testing process, or design and construct a turnkey laboratory to meet your needs. From concept to commercialization, Intertek insight gives your business a competitive advantage.

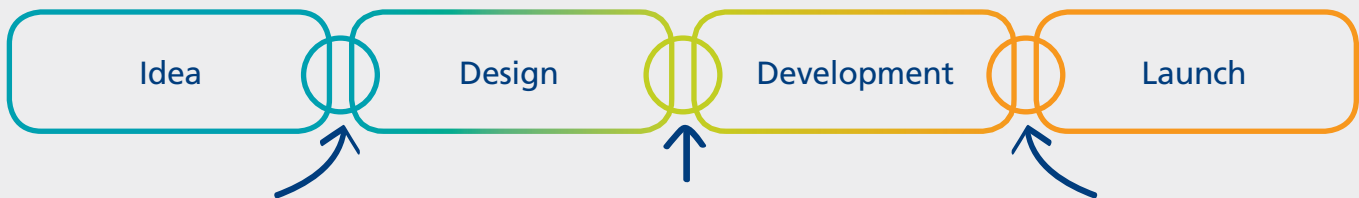

Training

Let our experts train yours. We help you understand new technologies, enter new markets, simplify complex requirements, comply with upcoming or current regulations, and avoid common product failure pitfalls. Our consultants will tailor a program to sharpen your teams’ skills and arm them with the knowledge to resolve existing issues and anticipate future challenges.

It's your business.
Intertek Consulting Services
helps you simplify it.
