

The Intertek logo is positioned in the top right corner of the page. It consists of the word "intertek" in a lowercase, sans-serif font, with the "i" and "n" being a darker shade of blue than the rest of the letters. The background of the entire page is a photograph of a yellow shipping container with its door open, showing the interior structure and locking mechanism. The sky is blue with some white clouds. There are also decorative graphic elements: a large yellow circle on the left side, a smaller blue circle with white lines on the left side, and a white circle with orange lines on the left side, all overlapping the container image.

Total Quality. Assured.

GOVERNMENT AND TRADE SERVICES

VERIFICATION SERVICES CONTAINER SERVICES

Cargo container loading and unloading inspection services.
Total Quality. Assured.

An Intertek inspection provides you with added security and ensures safe transit of your goods. We are also on hand to offer advice from our team of experts on unit packing and how to improve your goods handling procedures.

Our range of Container Services have been specifically developed for clients that not only require reassurance during the loading and unloading process, but also that safety and quality requirements are met and that correct goods handling procedures are put in place and adhered to.

Container Loading

All Intertek inspectors are fully trained to supervise and closely monitor the loading process. Before shipping they can check the:

- Quality and condition of your goods
- Quality and condition of packaging
- Adherence to correct goods handling procedures
- Condition of the container your goods are being transported in, including safety
- Correct loading of your goods and verify all documentation

Once these checks are completed the container will be sealed with Intertek security seals as proof of compliance and an inspection report will be issued to you within 24 hours of loading.

Container Unloading

As with container loading, you need the assurance that when your goods arrive they will be unloaded and handled correctly and arrive safely at their final destination.

During the unloading process an Intertek inspector will be present to ensure that your goods are handled with the due care and attention with which they were loaded.

On arrival they check the:

- Quality and condition of your goods
- Quality and condition of packaging
- Adherence to correct goods unloading procedures
- Accuracy and correctness of all documentation

Intertek has continued to expand its inspection network around the world and we are now able to offer a greater range of verification and advisory services to our clients covering more countries than ever before.

With our global network and expertise we can give you the assurance you need, no matter where you are located or where you are doing business. Intertek are your international quality control team.
