TECHNICAL INSPECTION SERVICES

Providing comprehensive insights into every aspect of your business

Intertek's technical vendor inspectors consistently and efficiently manage complex supply chains to ensure that products and equipment meet customer and industry quality standards.

Intertek's Expertise

The need for quality, safety and reliability are paramount as companies strive to meet the growing global demands for secure and sustainable sources of energy. Companies in diverse industries such as oil and gas, renewable, power, nuclear, engineering, chemical, and mining require a technical services partner that is committed to helping them meet these needs.

We have served the global energy industry for decades, providing world-class services such as inspection, expediting, technical auditing and site construction support. Utilizing services such as these help our customers maximize efficiency, ensure the quality of their products, processes, and assets, and minimize risks that could impact personnel safety and the environment.

Large-scale projects with complex international supply chains rely on vendors and suppliers all over the world. To ensure product and supplies are delivered on time and meet the required standards, you need assurance that your suppliers have the capability to fulfil your order and are working to your schedule and specifications. That kind of oversight demands global access to reliable, expert technical inspection services.

Our Technical Inspection Services

Vendor Inspection & Surveillance Activities

We have a global network of highly experienced inspectors, ready to carry out independent assessments of your material and equipment, including reviewing and witnessing special processes; assessing the quality of workmanship, and dimension condition and reporting results.

By detecting any problems early on in the supply process we can save you rework and replacement costs, and ensure that your product or plant is delivered on time and to specification.

Construction Support Services

Whether offshore or on land, we can help deliver the safe, successful completion of your construction project.

From providing individual specialists, to complete site management teams, our services can be tailored to meet the unique needs of your project.

Our areas of expertise include procurement support, project planning, monitoring and progress control, site inspection services, health, safety and environmental management, as well as data and records management.

Expediting

As your expediting partner, we are your eyes and ears, working with every link in your supply chain. Our teams are strategically located in the world's most active industrial centers, ready to work directly with your suppliers wherever they're located.

By taking a proactive approach we can help you to pre-empt potential delays.

We work with manufacturers from the outset to verify specifications, monitor production and oversee shipping.

Technical Auditing & Assessment

You need to be sure that your chosen or potential vendors and suppliers can deliver.

Working with multiple vendors and suppliers, often located far from your site, makes assessing their capabilities a real challenge. We can help you gain a complete understanding of vendor capabilities through a systematic and independent vendor assessment.
