

GLOBAL CRUDE OIL SERVICES

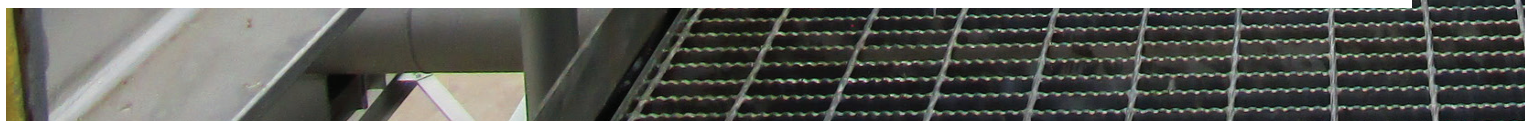

Global Crude Oil Testing, Inspection, and
Related Expertise.

Crude oil testing, inspection and measurement services.

Intertek Caleb Brett is an industry leader in supporting the oil and gas industry with a diverse range of technical crude oil services, supporting crude oil clients from the reservoir to the refinery. Our global network is fully at your disposal.

Intertek Caleb Brett is a global provider of crude oil testing, inspection and measuring services. Our experts worldwide offer Total Quality Assurance 24 hours a day, 7 days a week.

Our expertise includes crude oil quality testing, full oil assay & flash assay, cargo inspection, cargo treatment, inventory measurement, fiscal allocation and other services supporting crude oil clients from the reservoir to the refinery.

With more than a 1,000 offices and laboratories in over a 100 countries, Intertek Caleb Brett has experienced personnel and facilities with state-of-the-art instrumentation located across the globe. Intertek has a presence at all of the major crude oil exploration, production, transportation, storage and refining locations. Bringing quality and safety to life where we're needed, when we're needed.

Additional crude oil expertise in the global Intertek laboratory network includes detailed

hydrocarbon analysis, trouble-shooting, contamination identification, research & development support, and other world-class capabilities.

Crude oil testing is performed to **ASTM, API, ISO, IP, UOP** and other industry standards accepted by the global oil & gas industry. Intertek staff across the world are familiar with hundreds of different crude oil types and blends, and have significant experience in testing and inspection expertise.

Crude oil sample acquisition, sample transport, cargo inspection, sample testing and sample reporting are handled in a prompt, confidential and professional manner.

Intertek crude oil services include:

- Crude Oil Assay
- Crude Oil and Petroleum Feedstock Testing
- Crude Oil Quality Testing and Monitoring
- Flash Assay Database Management
- Rapid Yield™ Simulated Distillation
- Real-Time Hydrocarbon PT5™ Composition Measurement
- Petroleum Cargo Inspection and Additive Treatment
- Loss Control & Expediting
- Trace Metals Analysis, including Mercury and Mercury Species
- Opportunity Crude Oil Expertise
- Crude-by-Rail Oil Rail Car Services
- Hydrogen Sulfide Management
- Upstream Reservoir and Exploration & Production Services
- Pilot Plant and Process Development Optimization
- Crude Oil and Feedstock Quality & Assessment Training
- Waterdraw Pipe Prover calibration.
- Small Volume Provers
- Bi-Directional Provers
- Un-Directional Provers
- Prover Refurbish and repairs
- And more....
