## GLOBAL SUSTAINABILITY SOLUTIONS

# **Sustainability Solutions**

Companies are increasingly facing challenges in their sourcing, production and distribution chains, as well as addressing consumers' expectations for corporate sustainable responsibility of their products, services and behaviors.

Intertek's Total Quality Assurance (TQA) proposition recognizes that with increasing value chain complexity, our clients need a trusted partner and integrative sustainable solutions. Powered by our independent technical expertise and supply chain management tools, our sustainability services enable our customers to uniquely and authentically demonstrate their endto-end commitment to sustainability, building stakeholder trust and corporate value.

Our proven value chain expertise, global network and on-the-ground local knowledge help our customers with increased transparency to manage risk and resiliency, whilst supporting their ability to operate effectively and act responsibly. Our customers trust us to ensure quality, safety and sustainability in their business, to protect their brands and to help them gain competitive advantage. We not only provide valuable insight into companies' current sustainability needs, we identity emerging trends, enabling our customers to manage the circular economy in their business and safeguard their reputation.

Through our global network of Sustainability Experts and integrated Assurance, Testing, Inspection, and Certification solutions, Intertek is uniquely placed to help organisations understand, achieve and validate their existing and emerging sustainability goals..

Everything you need to manage your life cycle of products, materials and processes - Intertek's Assurance, Testing, Inspection and Certification (ATIC) Services.
