

TOP 5 REASONS TO ATTEND POWER GENERATION SYMPOSIUM

Power Generation Asset Management Symposium will be hosted by Intertek's engineering consulting experts.

Interested in improving equipment reliability and safety through data, inspection, and knowledge management? Intertek Engineering technical experts will be sharing their knowledge of renewable power and high energy piping for cost effective and reliable operation. Here are just five reasons why you should attend.

Reason 1:

Intertek Engineering Consulting (previously APTECH Engineering) has been studying power plant cycling since 1979 and has been an industry leader in determining the impact of flexible generation on equipment life and the cost.

Reason 2:

Learn how systems' integrity are affected. You will also learn about latest changes in the Code requirements, what other utilities do to tackle these issues and how to manage your data.

Past ATTENDEE

"As always this is a very useful informative and fun conference. I really appreciated the learning and sharing."

Reason 3:

Indepth discussions focused on global trends of renewables, energy market changes, and plant technology evolution.

Reason 4:

Content rich symposium filled with subject matter experts, and industry experts sharing their knowledge and experience. Discussing energy market challenges and opportunities, with case studies from the U.S. and around the world.

Reason 5:

Deep dive into power plant integrity management issues and how asset integrity management helps increase asset performance and reliability.

Brisbane LOCATION

Famous for its amazing climate that is near perfect all year round. The combination of 'fun and sun' is always the main appeal of the city
