

ROAD TANKER INSPECTION SERVICES

Ensuring conformance with Intertek's KENAS Accredited Road Tanker Inspection Services.

The transport of dangerous goods in Kenya is a complex affair. It is regulated by the Energy Act 2019. This Act requires compliance to the Licensing of Petroleum Road Transportation Business, Road Tankers and Drivers -2020 National Regulation

Transport of Dangerous Goods

Our Intertek experts stay abreast of regulatory changes so that they can support our clients' compliance and safety needs to best serve our clients in the petroleum and petrochemical sector.

Our inspection and laboratory services have international recognition from organizations such as TIC (Formerly IFIA) and accreditation to ISO/IEC 17020 (Inspection of Petroleum Road Tankers) and ISO/IEC 17025 (Laboratory) from the Kenya Accreditation Service (KENAS).

Structural Integrity

The structural integrity of road tankers is vital for minimizing the risk for product leakage or roadway accidents and ensuring the safety of personnel and the environment. Compromised structural integrity of a road tanker can be very costly—whether that be repair costs, traffic law violations or possibly exclusion from entering work sites.

Intertek's proactive and preventative action services include inspection, consulting and other technical services to help customers comply with the local regulations and requirements for road tankers transporting dangerous and non-dangerous goods.

Benefits of conforming to the Energy Act 2019

- Assurance of dangerous goods' safe transport
- Extended tank life expectancy
- Up-to-date documentation for legal compliance
- Minimized risk of hazardous environmental impact due to spills
- Expedited issuance of loading passes on site
- Promotion of insurance guarantees

Road Tanker Inspection Services
