

TOTAL QUALITY ASSURANCE FOR HVACR EQUIPMENT

Get your products to market quickly, all across the globe

Intertek is the world's largest independent HVACR testing company, providing manufacturers with nearby service through a network of labs across the globe.

Total Quality Assurance

HVACR manufacturers and leading industry associations partner with Intertek to expand their capacity and global footprint, through Intertek's own extensive network of services and expertise. Our experts regularly participate on technical panels and standards writing committees. This provides us, as well as our clients, with unique insights into the current and future state of the industry.

From energy efficiency and smart appliances to multi-split technologies, we understand this quickly-changing market. We know what will keep your product at the forefront. Whatever the future holds, we'll get you there first.

Why Manufacturers Partner with Intertek

Faster time-to-market – We provide a single source for product planning, testing, and certification needs. This saves you time and money, and provides you with the ability to reach more markets faster.

Expertise – Our engineers know your products, your industry and the standards your product must meet, helping you keep your products and projects on track.

Integrated – We can handle all of your product testing and certification needs,

including safety, performance, EMC, quality and much more.

Global Research and Certification – Our knowledge of global requirements can help you with approvals for your target markets all over the globe.

A-to-Z of HVACR Equipment Services

- Acoustical testing
- Air-to-air energy recovery testing
- Build and design services
- CE Marking (access to European Union)
- Certification program testing (AHRI, AHAM)
- Component verification testing
- EMC testing
- Energy efficiency
- Energy Management Systems consultancy (Smart Building/Internet of Things)
- Environmental & Chemical (RoHS, REACH, WEEE, Prop 65, etc.)
- Field labeling
- GSA schedule services
- Hazardous Locations / Explosive Atmospheres – certification and training
- Lubricant analysis
- Materials compatibility (refrigerants and

lubricants with metals, seals, elastomers, gaskets, additives, motor materials, desiccants and related process fluids)

- Performance testing (ASHRAE, AHRI, ISO, and AHAM)
- Product design review
- Refrigerant analysis
- Research & development assessments
- Safety testing and certification (ETL)
- Satellite™ - data acceptance program
- Transition testing from UL 1995 to UL 60335-2-40
