

World Accreditation Day 2019

TODAY IS
WORLD ACCREDITATION DAY

The International Accreditation Forum (IAF) and International Laboratory Accreditation Cooperation (ILAC) established this day to raise awareness for the importance of accreditation activities.

World Accreditation Day 2019 focuses on how accreditation adds value to supply chains.

Intertek is an accredited provider of certifications such as ISO 9001 and ISO 14001, which include criteria to manage your supply chain.

We also offer several supply chain management solutions through our Supply Chain Assurance group.

The global nature of supply chains means that businesses have to operate in multiple and often differing regulatory environments. Determining the quality and authenticity of raw materials or components requires credible information.

For over 130 years, Intertek has been providing Total Quality Assurance to organizations in order for them to maintain transparency and traceability in their supply chains.
