

REFINERY SUPPORT SERVICES

intertek
Total Quality. Assured.

A COMPLETE SECTOR SOLUTION

DISTILLATION

Intertek are experts in quality control and troubleshooting and can support operations across the distillation process with a range of services including:

- Crude Oil Assay
- Deposit Analysis
- Real-time blend optimisation

REFINED PRODUCTS

Ensuring the quality of the end product is a vital component in refinery operations. Intertek can provide quality testing services on refined products to a variety of industry standards covering:

- Catalyst evaluation
- Metering Services
- Specification testing (physical and mathematical)
- Oil condition monitoring and trending

PIPES AND PREHEAT

Our experts can support refinery operations for pipes and preheat to ensure operations continue to run smoothly through a range of services including:

- Metering services
- Deposit analysis
- Online composition measurement

DISTRIBUTION AND LOGISTICS

Intertek can offer a range of services covering refinery distribution and logistics processes including:

- Loss control
- Tank calibration
- Metering services
- Specification testing
- Cargo inspection

STORAGE AND BLENDING

Ensuring accurate and effective storage and blending is key in maintaining an effective operation and producing a high quality end product. Intertek specialise in a number of areas that can support these operations encompassing:

- Tank calibration
- Crude oil assay (physical and mathematical)
- Crude compatibility assessment
- Mercury analysis
- Cargo inspection

PROCESS WIDE CAPABILITIES

Intertek have expertise in a number of areas of Assurance, Testing, Inspection and Certification that clients can benefit from across the entire refinery process including:

- Quality management
- Laboratory design
- Data analytics and troubleshooting
- Laboratory and analytical services
- Man power services
- Materials, corrosion and integrity engineering
- Non-Destructive testing (NDT)
- Environmental and regulatory compliance
- Failure investigation
