

## Toxicology Assessment for Cosmetics

### Your Challenges

The European Directive on Cosmetics Security (76/768/EEC) is applicable for all products made available in any EU Member State.

According to the regulation, these cosmetics have to be harmless to human health and be correctly packaged and labelled.

In order to ensure compliance you need a partner, not only to perform safety assessments, but also be able to propose technical and statutory support in various countries of the globe.

### Our Solutions

Intertek's EUROTOX toxicologist network brings you expertise to every stage of the process, from raw materials to a finished cosmetic product launch, helping you comply with EU Directive 76/778/EEC and ensuring that your products are safe.

Our services include:

- Evaluation of the safety / assessment of cosmetics to the following regions:
  - European Union (76/768/EEC Directive)
  - US
  - Canada
  - Saudi Arabia and the Gulf States
  - Israel
  - ASEAN communities
- Advisory services for ingredients and labelling
- Regulatory status of ingredient
- Management of your Material Safety Data sheet (MSDS): Collect of information, creation, on-line consultation
- Check the cosmetic file (Product Information File - PIF)
- Label review
- Declarations to the anti-poisons centres (Paris, Lyon and Marseille)

Intertek offers a complete solution for toxicology assessment.

We help our customers to comply while giving them the competitive edge.
